Investment code	ISIN	Bloomberg
B Class	IE00BYQDDJ00	PRGLBBA ID

## Risk profile

◀ Risk of not earning meaningful inflation-beating returns over the long-term

Variability of returns over the short-term ▶

## Fund facts

### Fund objective

The Fund's objective is to generate investment returns through exposure to global bonds and interest-bearing instruments over the medium term.

### Investor profile

Investors seeking returns from a diversified portfolio of global debt and fixed income securities. The recommended investment horizon is 2 years (or longer when used as strategic exposure to the asset class).

### Investment mandate

The Fund aims to achieve its investment objective by investing in a diversified portfolio of global debt and fixed income securities. The Fund may invest in other collective investment schemes and in financial derivative instruments.

### Investment manager

M&G Investment Management Limited (UK)

### Fund managers

Jim Leaviss  
Eva Sun-Wai  
Robert Burrows

### Morningstar category

Global Flexible Bond

### Benchmark

Distributor:	MandG Investments Unit Trusts (South Africa) (RF) Limited
Depository:	State Street Custodial Services (Ireland) Limited
Administrator:	State Street Fund Services (Ireland) Limited

## Fund commentary

In general, both equities and bonds were weaker in April. This was mainly due to growing evidence of sticky US inflation, which raised questions as to whether the US Federal Reserve (Fed) would be able to cut rates this year. A sequence of robust economic data in the US early in the month, together with disappointing inflation readings, prompted US Fed Chair Jerome Powell to say that recent data did not give the Fed greater confidence that inflation was moving sustainably towards its 2% target. Instead, he said the data "indicate that it's likely to take longer than expected to achieve that confidence". As a consequence, investors pushed back the timing of expected US interest rate cuts from June to September. US consumer prices increased by 3.5% y/y in March, the biggest rise in six months and ahead of the 3.4% forecast. Meanwhile, US GDP growth came in weaker than expected for Q1 2024 at 1.6% (q/q, annualised), well below the 2.4% expectation. In the UK, inflation eased to 3.2% y/y in March from February's 3.4%, but still above the BOE's 2.0% target. The UK economy is expected to expand 0.4% in 2024, then accelerate to 1.2% and 1.4% growth in 2025 and 2026, respectively. Turning to the Eurozone, CPI declined unexpectedly to 2.4% y/y in March from 2.6% the previous month, fuelling hopes that the ECB will start to bring down interest rates from their record high. The ECB said rate cuts are data-dependent, not Fed-dependent, hinting that it was still considering easing monetary policy despite the Fed's unmovable stance. The Eurozone's Q1 2024 GDP, at 0.3%, was better than expected after two successive quarters of 0.1% contraction.

China's economy grew at a stronger-than-expected 5.3% y/y in Q1 2024, above the 4.6% estimate. This was due to robust expansion in high-tech manufacturing and prompted a rally in equity markets. China's CPI was weaker than expected in March at 0.1% y/y. In Japan, the BOJ kept interest rates around zero as widely expected and signalled its readiness to hike borrowing costs later this year. The Bloomberg Global Aggregate Bond Index returned -2.5% in April.

As 2024 progresses, we continue to believe that the main opportunity remains in duration. We think the more likely scenario for this year is not a soft landing, but a slowdown followed by central banks cutting interest rates. Therefore, we want to be exposed to government bonds and longer in interest rate duration, which we would expect to perform well in such a scenario. Conversely, we continue to seek to position the portfolio more defensively in credit and risk markets. In response to inflows during the month, we topped up some sovereign bond positions, including the UK, US and Germany. Conversely, we reduced our exposure to Italian BTPs in light of recent outperformance against German bunds and other peripheral bonds and noting a less constructive fiscal picture in Italy, in our view. We also switched some French OATs for some EU supranational bonds, which we believe have less fiscal risk. With Thames Water still in the news, we sold some Thames Water bonds maturing in 2031 and cognisant of wider spill over risks, we also sold Wessex Water and reduced some Southern Water exposure. We sold some longer end sterling bonds, as we believe this part of the market looks expensive.

## Glossary

<b>Accumulation class</b>	An accumulation class does not make income distributions. Income is accrued daily in the net asset value of the class.
<b>Annualised performance</b>	The average amount of money (total return) earned by an investment each year over a given time period. For periods longer than one year, total returns are expressed as compounded average returns on a yearly basis.
<b>Cumulative performance graph</b>	This illustrates how an initial investment of R100 or N\$100 (for example) placed into the Fund would change over time, taking ongoing fees into account, with all distributions reinvested.
<b>Maximum drawdown</b>	The largest drop in the Fund's cumulative total return from peak to trough over any period.
<b>Monthly volatility (annualised)</b>	Also known as standard deviation. This measures the amount of variation or difference in the monthly returns on an investment. The larger the annualised monthly volatility, the more the monthly returns are likely to vary from the average monthly return (i.e. the more volatile the investment).
<b>Percentage of positive rolling 12 months</b>	The percentage of months, since inception, that the Fund has shown a positive return over a rolling 12-month period.
<b>Total Expense Ratio (TER)</b>	This shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated for the year to the end of the most recent completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.
<b>Transaction Costs (TC)</b>	The percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.
<b>Total Investment Charges (TIC)</b>	The percentage of the value of the Fund incurred as costs, relating to the investment of the Fund. As fund returns are reported after deducting all fees and expenses, these costs (the TER, TC & TIC) should not be deducted from the fund returns.
<b>Unit class</b>	M&G's funds are offered in different unit classes to allow different types of investors (individuals and institutions) to invest in the same fund. Different investment minimums and fees apply to different unit classes.

## Disclaimer

The information does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act of South Africa. The use or reliance on this information is at the users' own risk. Independent professional financial advice should always be sought before making an investment decision. The M&G (South Africa) Global Funds (ICAV) ("the ICAV") full prospectus and the underlying Fund's supplement is available free of charge from the ICAV or at <http://www.mandg.co.za>. Any offering is made only pursuant to the relevant offering document, together with the current financial statements of the relevant fund, the statement of similarities and differences and the relevant subscription, application forms, all of which must be read in their entirety together with the prospectus and supplements. No offer to purchase will be made or accepted prior to receipt by the offeree of these documents, and the completion of all appropriate documentation. Collective Investment Schemes (CIS) Funds are generally medium-to long-term investments. Past performance is not necessarily a guide to future investment performance. The Fund's prices are calculated on a net asset value basis, which is the total market value of all assets in the fund including any income accruals and less any deductible expenses such as audit fees, brokerage, and service fees, and is traded at the ruling forward price of the day. The Fund may borrow up to 10% of the Fund's value, and it may also lend up to 50% of the scrip (proof of ownership of an investment instrument) that it holds to earn additional income. A fund may consist of different fund classes that are subject to different fees and charges. All fees are stated in the prospectus. The AIFM may, at its discretion, close the Fund to new investors and to additional investments by existing investors to make sure that it is managed in accordance with its mandate. The AIFM makes no guarantees as to the capital invested in the Fund or the returns of the Fund. The Fund may hold foreign securities including foreign CIS funds. As a result, the Fund may face material risks. The volatility of the Fund may be higher, and the liquidity of the underlying securities may be restricted due to relative market sizes and market conditions. The Fund's ability to settle securities and to repatriate investment income, capital, or the proceeds of sales of securities may be adversely affected for multiple reasons including market conditions, macro-economic and political circumstances. Further, the return on the security may be affected (positively or negatively) by the difference in tax regimes between the domestic and foreign tax jurisdictions. The availability of market information and information on any underlying sub-funds may be delayed. Fund prices are published daily on the M&G website. These are also available upon request. The performance is calculated for the fund. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and withholding tax. Purchase and repurchase requests must be received by AIFM by 14h00 (UK Time) each business day.
